

Keep Dad looking sharp

This Father's Day, show Dad you care about his health and happiness. Here's how:

- ✓ Go with him to get a haircut.
- ✓ Let him win at a game of hoops.
- ✓ Talk with him about scheduling a comprehensive dilated eye exam.

African Americans are at higher risk for glaucoma, which can only be detected through a comprehensive dilated eye exam. Early detection is critical to preventing vision loss. Help Dad protect his sight for many Father's Days to come.
